POND VIEWER SYSTEM

An icon-first workspace for focused viewing.

This synthetic document exists only for local visual QA.
It verifies sharp pages, search, navigation, zoom, fit, and rotation.

Key controls

- Page thumbnails and search
- Previous and next page
- Zoom, fit width, fit page, and rotation
- Open and export original file

SECOND PAGE

The toolbar uses Pond components, icons, and visual tokens.

Familiar actions use icons with accessible names and tooltips.
Ambiguous actions keep text labels or live in focused menus.

The sidebar appears from its trigger and persistent controls stay in place.

THIRD PAGE

The viewer preserves Pond’s continuous reading model.

Specialist PDF controls now share the same shell as image and video.
